Profile Summary

Full Stack Engineer with 1+ years of experience building scalable backend systems, web applications, and GenAI-powered products using **Java, Python, Spring Boot, Node.js, React, MongoDB, and PostgreSQL**. Skilled in **REST/GraphQL** API design, **LLM** agent orchestration with **LangGraph**, event-driven architecture, microservices, and cloud-integrated systems on **GCP** and **Vercel**.

Technical Skills

Languages: Java, JavaScript, TypeScript, Python

Frontend/Backend: React, Node.js, Express.js, Spring Boot, REST, GraphQL, Tailwind CSS, JWT

Databases & Cloud: MongoDB, PostgreSQL, Redis, GCP (Pub/Sub, GCS), Docker, Vercel, CI/CD

GenAI / LLM: OpenAI API, LangGraph, AI Agents, RAG, Embeddings, MCP, FastAPI, Prompt Engineering

Experience

ANNAM.AI

Dec 2025 - Present

Full Stack Engineer

Remote

- Built an automated disaster recovery pipeline by scheduling daily database backups to Google Cloud Storage using cron jobs and implementing restoration workflows for rapid recovery and improved data reliability.
- Engineered a full-stack audit logging infrastructure to capture and persist moderator actions within the reviewer system, significantly improving traceability and cutting operational audit time by **90 percent**.
- Optimized backend performance by eliminating redundant API calls and preventing duplicate record creation, reducing API requests by **50 percent** and duplicate document generation by **20 percent**, resulting in faster and more reliable user flows.

DIGISTRIQUE SOLUTIONS PRIVATE LIMITED

Jan 2025 - Nov 2025

Software Engineer

Mumbai

- Led the end-to-end development of an automated data archival system leveraging Spring Batch, REST APIs and Google Cloud Storage.
- Owned the strategic migration from RESTful API integrations to GraphQL. Delivered improved data retrieval efficiency and future-proofed the platform against REST endpoint deprecations.
- Integrated Customer.io SDK and webhooks to automate behavioral and transactional messaging based on key user actions. Built event-driven pipelines with Google Pub/Sub to stream real-time events.

Bank of Baroda

July 2015 - August 2023

Assistant Manager

India

- Led operations across 100 branches, improving efficiency by **20 percent** and driving **20+ crore** in deposit growth. Transitioned into software engineering via Crio.Do fellowship in late 2023.

Projects

Sales CRM System (Admin Portal) | Sales Portal | React.js, Vanilla CSS, Node.js, Express.js, MongoDB, Chart.js

- Built a full-stack Sales CRM platform with distinct Admin and Sales portals, implementing automated language-based lead assignment, CSV bulk uploads, performance dashboards, and role-based workflows with real-time data persistence and performance tracking.

Multilingual Agri Q&A System | Python, FastAPI, LangGraph, OpenAI API, MongoDB Atlas Vector Search, React, TypeScript

- Built a multilingual (Hindi/English) LLM agent with LangGraph, using RAG, vector-search semantic caching, and agentic tool-calling for weather and price lookups.

Education

Crio.Do

Nov 2023 - March 2025

Fellowship in Backend Development

- Relevant Coursework:** Java, Spring Boot, Object-Oriented Design, Data Structures and Algorithms

National Institute of Technology, Allahabad

2009 - 2013

B.Tech, Chemical Engineering

Allahabad
